IDENTIFIERS *Virginia

ABSTRACT

Statistical data on in-state, first-time freshmen entering Virginia's state-supported institutions of higher education in 1993-94 are presented. The first table summarizes the academic performance of students for identified private high schools, by area. The second table summarizes the academic performance of students for identified public high schools, by school district. Data in each table include: number of first-time freshmen enrolled in fall 1993, number and percentage who took remedial courses, percentage who returned in the spring of 1994, median grade point average, number and percentage with grade point averages greater than 2.5, median credit hours, and number and percentage with credit hours greater than 30. Academic Performance Characteristics

Explanation of Data

The enclosed information is based on data submitted to the Council of Higher Education by the 39 state-supported institutions of higher education. These data represent the performance of first-time freshmen attending Virginia's public institutions in 1993-94. A first-time freshman is defined as a student who is attending college for the first time. While the students referenced in this report may not necessarily have graduated from high school in the previous spring, most of the them are recent high-school graduates.

The first table summarizes the academic performance of students for the identified private high school by area. The second table summarizes the academic performance of students for the identified public high school by school district.

In order to maintain confidentiality, institutions with less than a total count of three (3) students were excluded from this report.

High School Type: Private

August 1994
